Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 November 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-10, 13-20, 24 and 29-34 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-10, 13, 14, 16, 17, 19, 20, 24, 29, 30, 32 and 34 is/are rejected.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-10, 13, 14, 16, 17, 24, 29, 30 and 32 are rejected under 35 U.S.C. 102(a and/or e) as being anticipated by Lunde et al ('111).

Per claims 1 and 29, Lunde et al discloses a seismic cable (see Figs. 1 and 11) that includes a tension support cable (32), a signal cable (36) attached to the support cable at a plurality of first points (38c) spaced along the length of the signal cable at a plurality of second points (38c), and at least one sensor (30) disposed on the signal cable at a third point (30).

Per claims 2 and 3, see jacket (39).

Per claims 4, 5 and 10, see strengthening members (32).

Per claims 6-9 and 30, see elements (36a, 36b and 36c).

Per claims 13 and 14, see sensor modules (30) and electronics modules (34).

Per claims 16, 17 and 32, see Fig. 8.

Per claim 24, see Figs. 8 and 9.

3. Claims 1, 19, 20, 29 and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuppenbach ('276).

Per claims 1 and 29, Kruppenbach discloses a seismic cable (see Fig. 2) that includes a tension support cable (30), a signal cable (14) attached to the support cable at a plurality of points spaced along the length of the signal cable, and at least one sensor (12) disposed on the signal cable.

Per claims 19, 20 and 34, see element (22).

Allowable Subject Matter

4. Claims 15, 31 and 33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments filed November 5, 2008 have been fully considered but they are not persuasive.

Per the Lunde patent, applicant argues that Lunde does not disclose that attachments along the two cables are at a plurality of points such that the signal cable is mechanically decoupled from the tension support cable. Applicant's attention is

directed to col. 8, lines 15-32, wherein the buoyancy pill (3bc) has openings on either side that would inherently allow one to mechanically decouple the signal cable (36) from the support cable (32).

Finally, with respect to Kruppenbach, it is irrelevant whether the cable 30 operates only during retrieval since this has no bearing on the specific claim limitations.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
